BNBX
FINANCE

/ INTRODUCTION

BNBX aspires to drive blockchain adoption by nurturing innovative artists while streamlining the monetization process. BNBX leverages best-in-class services that yield unparalleled value for investors, curators, and artists.

The BNBX ecosystem consists of the BNBX Protocol and the BNBX NFT Marketplace, with plans for more additions in the future. The BNBX Protocol (\$BNBX) is the underlying token powering the BNBX ecosystem.

/ BNBX CHARITY

The BNBX Team promises to donate 1% of all the BNBX transactions ever made. At "Stage I" the community will vote for their favorite Charitable Organization on our social media channels (Twitter & Telegram). At the end of each month/quarter, the BNBX team will liquidate the Charity address and donate the funds to the most voted charitable organization.

At "Stage II" a BNBX.Charity DAO will be set up where every BNBX holder will be granted the right to vote for their favorite charitable organization and every month/quarter the Charity address will be liquidated automatically. The BNBX Team will then follow up and donate the funds to the most voted charitable organization.

/ BNBX PROTOCOL (\$BNBX)

We will issue our token coin, called the BNBX. A strict limit of 1,000T BNBX will be created, never to be increased. A total of 500T BNBX tokens will be burned before the pre-sale is launched. BNBX will run natively on the Binance blockchain with BEP 20.

/ TOKENOMICS

Each BNBX transaction is taxed, and a small percentage of the coins are distributed back to the BNBX holders. The 10% tax on transactions is split as it follows:

- 4% Distributed to \$BNBX holders
- 3% Sent to the liquidity pool
- 1% Sent to the charity donations address
- 1% Sent to the token buy-back program
- 1% Sent to the Marketing & Development wallet

/ **BNBX VALUE & REPURCHASING PLAN**

You can use BNBX to pay for any fees on our platform, including but not limited to:

- NFT trading fees
- NFT purchase fees
- Withdrawal fees
- Auction creation fees
- Any other fee

REPURCHASING PLAN

Every quarter, we will use 20% of our marketplace's profits to buy back BNBX and destroy them, until we buy 25% of all the BNBX (250T) back.

Additionally, every Monday the BNBX team will use the funds gathered from the 1% Buy-Back program explained under our Tokenomics page to buy BNBX tokens and burn them.

All buy-back transactions will be announced on the blockchain. We eventually will destroy 750T BNBX, leaving 250T BNBX remaining.

/ BNBX NFT DIGITAL-ART MARKETPLACE

TRADING ENGINE

Our platform's engine is capable of sustaining 400,000 operations / minute, making BNBX.Art one of the fastest NFT platforms in the market today. You can be certain, on our marketplace, that your NFT trades will never be stuck due to the trade engine being overwhelmed.

FUTURE ROLLOUT

We will roll out the platform in roughly the following order.

- NFT Creation
- NFT Trading Orders Creation (OTC)
- NFT Auction System
- NFT Gifting System
- Charity NFT Auctions

/ RISKS

There are many risks involved in running an NFT Marketplace. We understand this and have the skills, experience, and leadership to overcome them.

SECURITY IS PARAMOUNT

Many crypto contracts/platforms have failed due to poor security procedures. Most security breaches could have been prevented by taking simple precautions to protect critical resources. Our team will develop BNBX.Art with security as the foremost concern in their minds. We strive to ensure that we will follow all the industry best practices when it comes to securing infrastructure and data including ISO/IEC 27001:2013 and the Cryptocurrency Security Standard (CCSS).

MARKET COMPETITION

We know this will be an ultra-competitive space. There are probably hundreds, if not thousands of teams wanting, planning, or doing NFT Marketplaces. The competition will be fierce. But at this age, this is a common risk in any decent concept/startup or mature company.
